Notes to the Financial Statements

9 IMPACT OF RECENT ECONOMIC CONDITIONS

The Directors are continuously monitoring the existing and the anticipated effects of the economic crisis, the circumstances of the external environment, as well as the resulting consequences to the company in order to take appropriate measures to manage the impact.

I. Increase in interest rates

The sharp increase in interest rates adversely impacted the interest cost of the group and the company and it is expected to increase marginally in the coming months as well. This increment in finance cost was mainly due to higher working capital requirements in the group as a result of the sharp depreciation of the Rupee along with curtailing of supplier credits by foreign suppliers due to the downgrade of the country's credit rating by international credit rating agencies subsequent to the weakening of the economic stability of Sri Lanka.

The following measures were taken to reduce the impact of increase in interest rates;

- Fixed the interest of short – term working capital loans for a longer period based on money market conditions.
- Minimised borrowings by reducing credit periods offered to the customers whilst encouraging advance payments, thereby improving the liquidity of the company.
- Continues control and monitoring measures taken to improve the recoveries from debtors to reduce the borrowings
- Strategic initiatives driven by the management to prioritise essential capital expenditure

II. Fluctuation of foreign currency and significant rupee depreciation

With the significant rupee depreciation, cost of materials have increased significantly resulting in higher working capital requirements. Further, price revisions have adversely affected the consumer demand.

The rupee depreciation positively affected the export company's within the group which resulted on increase in the topline and bottom line. However, maintaining the exchange rate at a fixed level for an extended period posed challenges in maintaining competitiveness in the international market place given the expected tax changes and high inflation rate. Strategic measures were taken to obtain working capital funding in local currency whilst closely monitoring the currency rate movement

The following measures were taken to reduce the impact of a significant depreciation of the Rupee;

- Implemented prudent strategies to revise price in a timely manner based on market outlook
- Adopting a proper mix of LKR and foreign currency working capital funding while closely monitoring the currency rate movement.

III. Other Considerations

Despite the current slowdown of the economy, the marketing and business development teams of the group continues to pursue new business opportunities to diversify the business risk whilst the operational teams focus on improving production efficiencies and reducing costs in order to increase the gross profit margins.
