Reinforcing its strong financial trajectory, the Bank reported Total Comprehensive Income of LKR 2.9 billion, marking an impressive 66% YoY growth.

Operating within a growth-oriented economic landscape, the Bank continued to focus on SMEs – a key sector of the national economy - thereby recording a commendable 36% or LKR 39.6 billion surge in customer advances during the year. Consequently, total advances reached LKR 150.9 billion, accounting for 74% of Total Assets, thereby positioning the Bank as the industry highest in core banking activities connecting to the real sector — a clear testament to its development-focused banking approach.

This performance was achieved while continuing to have one of the lowest industry-wide Stage 3 Impaired financing ratio of 1.2% owing to the Bank's effective risk management and underwriting standards, driven by its unique people friendly approach. The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the Financial Statements:

Balances with Banks, Balances with Licensed Finance Companies, Other Financial Assets and Other Financial Liabilities

For the above, the carrying value is a reasonable estimate of fair values.

Financial Assets at Amortised Cost - Financing and Receivables to Other Customers

The fair value of the above are estimated by discounting the estimated future cash flows using the prevailing market rates for financing as of the reporting date with similar credit risks and maturities (Level 3).

Financial Liabilities at Amortised Cost - Due to Depositors

The fair values of the above are deemed to approximate their carrying amounts as rate of returns are determined at the end of their holding periods based on the profit generated from the relevant investments.
