15. Related Implications of Increasing Foreign Exchange, Interest and Inflation Rates

Sri Lanka has been facing foreign exchange crisis with the prevailing economic situation in the country and the deterioration of foreign reserves is putting pressure on exchange rate to depreciate in the market. The direct exposure to foreign exchange rates of the Company is minimum due to the limited transactions carried out with foreign counter parties and the Company continues to monitor its effects on financial statements under various stressed scenarios.

Although interest rates and inflation have increased significantly during the last financial year, country experienced a decrease in interest rate parallel to the inflation decrease, from the final phase of 2022. The Company, being in the Insurance sector, will have a positive impact from increased interest rates on investments while inflation will have a negative impact on expenses.

Sri Lanka was able to reach a preliminary agreement with the International Monetary Fund (IMF) for an Extended Fund Facility. The Fund Facility is intended to restore macroeconomic stability and debt sustainability, to unlock the growth potential in the economy. However, Sri Lanka is still in the process of analysing the impact of these structural reforms including debt restructuring and impact of the same is uncertain.

The Board continues to monitor the potential implications of these factors on the company's business activities, profitability, solvency and liquidity position and will take proactive action to meet future obligations and ensure business continuity.
