There have been no other transactions involving ordinary shares or potential ordinary shares between the reporting date and the date of completion of these

7. Initial Application of SLFRS 16 - Leases

SLFRS 16 sets out the Principles for the recognition, measurement, presentation and disclosure of leases. This introduces a single, on-balance sheet lease accounting model for lessees. The standard removes the current distinction between operating and financing leases and requires recognition of an asset and a financial liability to pay rentals for virtually all lease contracts. An optional exemption exists for short term and low-value leases. Lessor accounting remains similar to the current standard. Lessee will be required to separately recognize the interest expense on the lease liability and depreciation expense on the right-of-use asset.

The company as a lessee has applied SLFRS 16 as initial application of 01st January 2020 using the modified retrospective approach at the present value of the remaining lease payments discounted using the incremental borrowing rate, on the lease-by-lease basis and therefore the comparative information has not been restated and continuous to be reported under LKAS 17 at the present value of the remaining lease payments discounted using the incremental borrowing rate, on the lease-by-lease basis.

The company is liable to pay income tax at the rate of 24%. Income tax rate of corporates has been revised to 24% from 28% as per the notice to tax payers and withholding agents on "implementation of proposed changes to the Inland Revenue Act No. 24 of 2017 dated February 12, 2020. Further CA Sri Lanka guideline dated 23 April 2021 stated that financial statements having a period end after 26 March 2021 should use such proposed tax rules and rates in the bill for determination of current tax and deferred tax.

Deferred Taxation is provided using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the tax base of assets and liabilities, which is the amount attributed to those assets and liabilities for tax purposes. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount substantively enacted by the reporting date.

Deferred tax assets, including those related to temporary tax effects of income tax losses and credits available to be carried forward, are recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be fully utilized. Deferred tax assets, if any, are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Accordingly the company made an assessment of future taxable profits and identified that total tax losses can be claimed within the prescribed period of the new Act. Accordingly a deferred tax asset has been recognized amounting to Rs. 110 Mn.
